

Wood source declaration

To whom it may concern:

Nordic Paper Bäckhammar AB produces the kraft pulp for the paper production in Bäckhammar and Åmotfors. (NP Sack and MF-, MG-, Electrotechnical-, Absorbent-, Steel interleaving- and Food Wrap Kraft papers)

In this production we utilize locally harvested timber. The forests are located in a natural radius around the mill and around the saw mills where we source our wood chips.

We use trees of the species:

Picea Abies (60 %) and Pinus Sylvestris (40%). But there may also be a small fraction of various Birch species (Betula SP) in our pulp.

Nordic Paper is FSC certified DNV-COC-000325, DNV-CW-000325.

All our raw material (wood) is at least "Controlled wood". The FSC "Controlled Wood" certification is audited annually by an independent certification organisation. It includes the process of evaluating all non-certified wood suppliers, for sustainability and socially acceptable harvesting practices, and ensuring that the applicable

Nordic Paper Bäckhammar AB is PEFC certified (cert no 2016-SKM-PEFC-144).

Swedish and EU laws, including the EU Timber regulation (EUTR) EU995/2010, are followed.

Re-planting of the forest is required and regulated by the Swedish Forestry Act. "Skogvårdslag (1979:429)".
